

## ERREU02 - Checking of guard-gives if it misses variables of order

---

### Summary:

This test validates the checking of the presence of the variables of order.

## 1 Principle of the test

---

This test is a data-processing test. It validates the checking of the presence of the variables of order. Two situations are tested:

- material function field of the temperature;
- material function field of the temperature and drying.
- constant material field.
